

DISARM 480 SC

Fungicide for Turf Uses

For fast-acting control of key diseases in cool season and transition zone turfgrasses.

ArmorTech Disarm provides broad-spectrum control of major turf diseases including:

- Brown Patch
- Anthracnose
- Gray Leaf Spot
- Zoysia Patch
- Summer Patch
- Summer Blight
- Dollar Spot Suppression

- ArmorTech Disarm offers outstanding disease control and protection on greens that is cost effective for fairways
- Spraying around storms or Irrigation needs can be a challenge. ArmorTech Disarm is quick to penetrate the plant and is rainfast in as little as 15 minutes
- ArmorTech Disarm can be used alone or tank-mixed with other ArmorTech products, jar testing is always recommended
- ArmorTech Disarm is fast-acting, with long-lasting systemic disease control from roots to leaves. The superior translaminar movement will help protect the underside of the leaves and other unsprayed surfaces
- Compare the control and performance of ArmorTech Disarm to other strobilurin fungicides and you will quickly see ArmorTech Disarm is in a class by itself!

*Always read and follow label instructions.
