

Sonnet™

A Wettable Powder Biofungicide

The **Number One** biofungicide formulation in agricultural markets is now available **exclusively** from **United Turf Alliance**.

ArmorTech® Sonnet™ is a new eco-friendly biofungicide produced with an award-winning, patented strain of Bacillus Subtilis QST 713 that offers a multitude of benefits for turfgrass and ornamental plantings.

RECOMMENDED USAGE

- Sonnet can be applied in a wide variety of weather conditions, temperatures and humidities
- Excellent tank mix partner with other fungicides and nutrient applications
- Tank mix with ArmorTech 44 (Phosphite) and ArmorTech CLT (Chlorothalonil) applications
- Labeled for all turfgrass applications including residential, golf and other commercial turf
- Best when used at low rate and short intervals (10-14 days)
- Improves turf health and quality and has the potential to reduce overall chemical usage
- Also labeled for ornamental plantings

HIGHLIGHTED BENEFITS

- Disease Control
- Tank-Mix Synergy
- Stronger Turf
- Eco-Friendly
- Enhanced IPM
- Foliar and Soil Activity

Always read and follow the product label for specific uses, rates and precautions. For more information visit www.UTAArmorTech.com
