

THREESOME™

2,4-D

MECOPROP-P

DICAMBA

THREESOME™ THREE-WAY SELECTIVE HERBICIDE

THREESOME™ is a three-way herbicide containing 2,4-D, Mecoprop-p and Dicamba for selective broadleaf weed control.

THREESOME™ is used on turfgrasses including sod farms to control clover, dandelion, henbit, plaintains, wild onion and many other broadleaf weeds. Also for highways, rights-of-way and other similar non-crop areas.

BENEFITS AND USES

- ❑ 2, 4-D, Mecoprop-p and Dicamba formulation
- ❑ Labeled for use on bentgrass
- ❑ Controls a wide variety of broadleaf weeds in turfgrass, including clover, henbit and wild onions

PACKAGING

2 x 2.5 Gallons per Case

30 and 55 Gallon Drums

250 Gallon Totes
