ArmorTech provides plant protection (or *Armor*, if you will) and ground support to help turf managers fight the various battles—dollar spot, crabgrass, environmental stress, budget constraints—with smart tools and innovative technologies (*that's the Tech*).

GROUND SUPPORT FOR **BATTLE TESTED** TURF MANAGERS

ArmorTech® Fungicides

ArmorTech® Rotator

New formulation of active ingredient fluazinam gives golf course superintendents powerful disease protection while managing resistance. Offers excellent application flexibility as a rotational partner for chlorothalonil and used in combination with systematic fungicides.

ArmorTech® CLT 720 XL

A liquid flowable fungicide that offers curative and preventative protection against major turf and ornamental diseases. Contains 54% chlorothalonil.

ArmorTech® ZOXY® 2F

Broad spectrum azoxystrobin fungicide for control of a variety of turfgrass diseases. Priced attractively for fairways sprays. Contains 22.9% azoxystrobin.

ArmorTech® CLT 825

A spray dry granule fungicide that offers curative and preventative protection against major turf and ornamental diseases. Superior formulation mixes thoroughly and stays in suspension. Contains 82.5% chlorothalonil.

ArmorTech® ZOXY®-T

A powerful combination of azoxystrobin and tebuconazole. The synergy created by two of the best golf fungicide technologies delivers broad-spectrum disease control for brown patch, dollar spot and soil-borne pathogens including Pythium.

ArmorTech® TEB 360 XL

ArmorTech® TEB 360 XL shows tremendous efficacy at low rates against a wide variety of turfgrass diseases. A 3.6 lbs/gal flowable formulation of tebuconazole.

ArmorTech® ZOXY PG **NEW!**

Broad spectrum granular fungicide combining 0.31% Azoxystrobin and 0.75% Propiconazole. Utilizes both root and leaf uptake to deliver preventative and curative control up to 28 days.

ArmorTech® IP 238

Provides extended disease control with contact and locally systemic modes of activity. Contains 23.8% iprodione.

ArmorTech® PPZ 143 MC

Broad-spectrum water based flowable fungicide containing 14.3% propiconazole. For disease control in both for cool and warm season turfgrass.

ArmorTech® TM 462

A systemic fungicide with curative and preventative disease protection against many major turf diseases. A flowable formulation containing 46.2% thiophanate-methyl.

ArmorTech® Fungicides

ArmorTech® TMI 2020 XL

Prevents and controls fungal diseases on turfgrass and ornamental plants. Contains iprodione and thiophanate methyl.

ArmorTech® Herbicides

ArmorTech® Tetra **NEW!**

Premium herbicide containing 2,4-D, fluroxypyr, triclopyr and flumioxazin used for fast, selective weed control in ornamental lawns and turfgrasses. The ester formulation provides excellent control for difficult-to-manage weeds including ground ivy and wild violet.

ArmorTech® Trione

Used during turf establishment and renovation projects to prevent or eliminate weeds and reduce competition with emerging turfgrass. Contains 40% mesotrione.

ArmorTech® Sulf 396

Sulfentrazone is a Protox inhibitor enabling quick control of sedges and many other weeds. Contains 39.6% sulfentrazone.

ArmorTech® CGC 40 WSP

Excellent preemergence and early-postemergence control of crabgrass. Contains 40% dithiopyr.

ArmorTech® Quin Pro

Used for post emergent control of many broadleaf and grassy weeds. A 75% dry flowable formulation of quinclorac.

ArmorTech® SureZone®

A proprietary and exclusive “four-way” post-emergent herbicide product containing four different active ingredients: sulfentrazone; 2,4-D; MCPP; dicamba.

ArmorTech® THREESOME®

A three-way selective broadleaf herbicide containing 2,4-D, dicamba and mecoprop-p. Used to selectively remove a wide variety of broadleaf weeds in golf, lawn care and sod farms.

ArmorTech® KADE 65 WDG

A water dispersable granular formulation of pre-emergent herbicide prodiamine. Broad spectrum control for annual grasses and broadleaf weeds in turfgrass and ornamental plantings.

ArmorTech® KADE 4L **NEW!**

Liquid formulation offers season long pre-emergent control of over 30 grassy and broadleaf weeds. Contains 40.7% prodiamine.

ArmorTech® Growth Regulators

ArmorTech® PGR 113 MC

A water-based microemulsion concentrate used to manage growth and improve quality and stress tolerance of warm- and cool-season turfgrasses. Can be used to help reduce line trimming frequency (space) around obstacles such as trees, cart paths and hazards. Contains 11.3% trinexapac-ethyl.

ArmorTech® PAC 223

A systemic plant growth regulator that slows vegetative growth by inhibiting gibberellin biosynthesis. Improves overall quality of turfgrass, suppresses Poa annua in bentgrass and perennial ryegrass greens, fairways and tees. Slows grass growth mowings and clippings for up to 2 months. Contains 22.3% paclobutrazol.

ArmorTech® GUILLOTINE®

A safe, long residual and broad spectrum insecticide with control against many pests in turfgrass, ornamental plants, interior plantscapes, and non-bearing fruit and nut trees. A 50% dry formulation of the insecticide clothianidin.

ArmorTech® IMD 75

ArmorTech® IMD 75 provides broad spectrum systemic insect control in turfgrass including sod farms, landscapes and ornamentals. A 75% dry formulation of imidacloprid insecticide.

ArmorTech® IMD 2F

Flowable formulation of Imidacloprid provides both foliar and systemic insect control in turfgrass, including sod farms and landscape ornamentals.

ArmorTech® 44

All phosphites are NOT created equal! ArmorTech® 44 is a concentrated urea phosphite fertilizer. Due to the unique urea-based formulation, ArmorTech® 44 is the most concentrated phosphite available to professional turfgrass managers.

ArmorTech® 28 +Si

ArmorTech® 28+Si is a buffered potassium phosphite product that also contains potassium silicate. Potassium silicate is known to strengthen plant cell walls.

ArmorTech® 45 SR

Concentrated urea phosphite fertilizer using a slow release form of urea that provides a unique formulation exclusive to United Turf Alliance.

Optimizer® Green Shade

A green pigment spray additive that improves turf appearance while serving as a spray pattern indicator. Optimizer® may be tank mixed with fungicides, herbicides, insecticides and wetting agents.

Optimizer® Sweet Iron

Yields outstanding residual color, increases nutrient uptake, and improves overall plant health. Optimizer® Sweet Iron is approved for use on golf course turfgrass, athletic turfgrass, and lawns.

Optimizer® PSi™ L

Optimizer PSi strengthens turfgrass by providing the key nutrient, silicon, delivered with a reliable carrier in a form that plants can immediately recognize and use.

United Turf Alliance products are available through our exclusive network of regional distributors, each of which is a helpful, experienced professional with deep technical knowledge and a commitment to service.
