ArmorTech® ROTATOR™ Fungicide

Introducing new ArmorTech® ROTATOR™ Fungicide, a uniquely formulated suspension concentrate containing fluazinam, delivering on-contact multi-site protection against difficult to manage turf diseases including dollar spot, brown patch, anthracnose and snow molds. ROTATOR's unique formulation is highly compatible with tank mixing and pairs with systemic fungicides to provide comprehensive turf protection. With a unique FRAC 29 classification and no known resistance issues, ROTATOR is the ideal partner for disease resistance management programs.

Rotation Flexibility

- ROTATOR provides maximum rotational flexibility with multi-site mode of action
- Multi-site mode of action that disrupts the energy production in the fungus
- Provides season long control of turf diseases, while managing resistance
- Can be used with both contact and systemic products
- Total control of your fungicide program and budget

Resistance Management

- The active ingredient in ROTATOR – Fluazinam has no known resistance.
- Its multi-site mode of action works quickly and effectively by inhibiting energy production of pathogen cells.
- Allows 12 annual applications at 0.5 fluid ounces / 1000

Control of the Toughest Turf Diseases

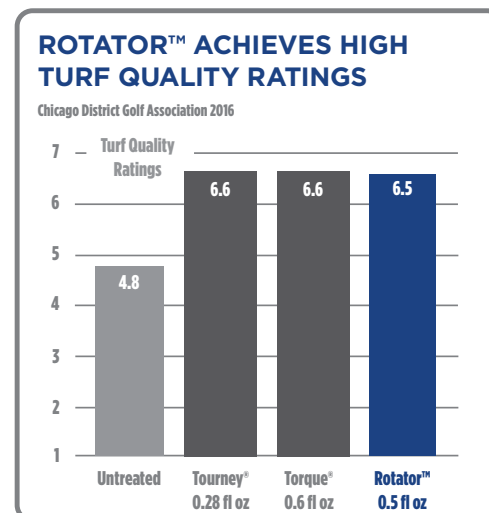

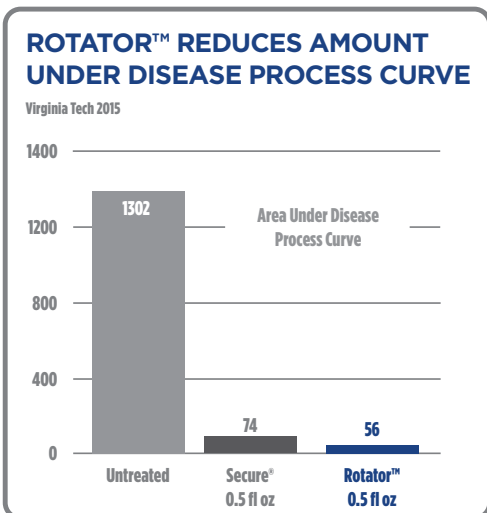

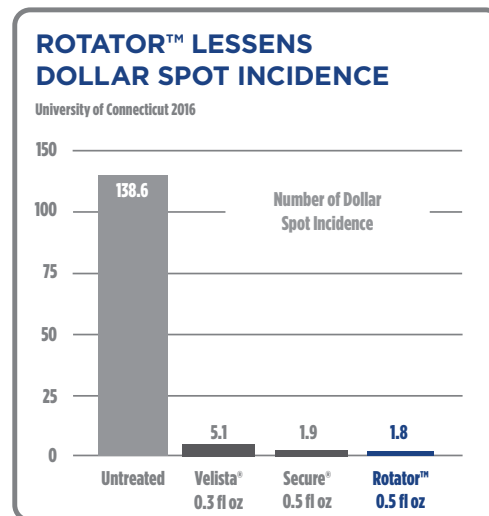

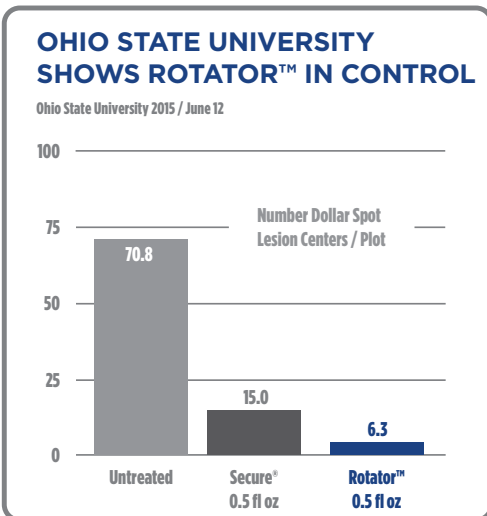

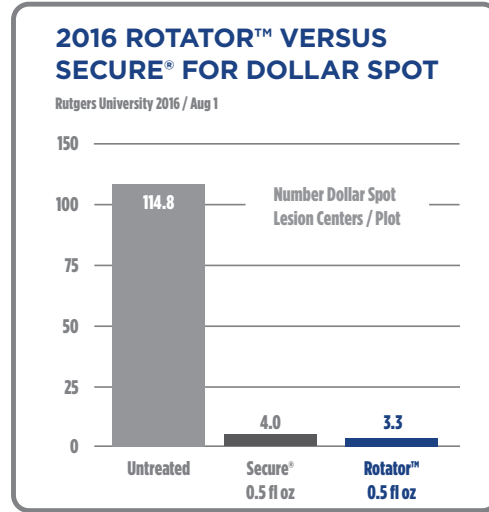

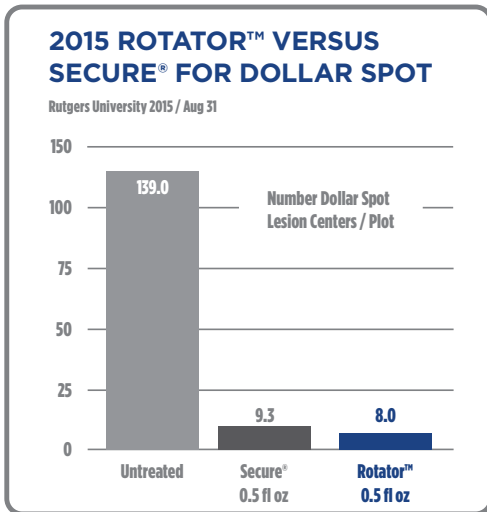

- Alone or in tank mix, ROTATOR has proven performance on turfs toughest diseases:
- Use rate of 0.5 fluid ounces / 1000 sq. ft.
- Excellent tank mix partner for systemic control options
- New formulation technology with Caution signal word

Diseases Controlled

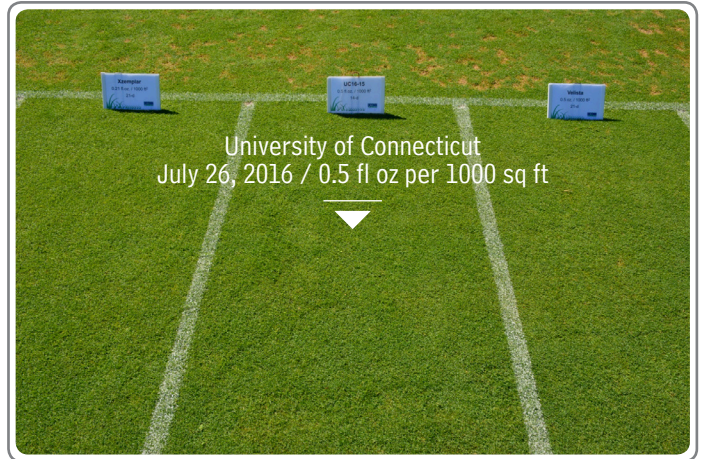

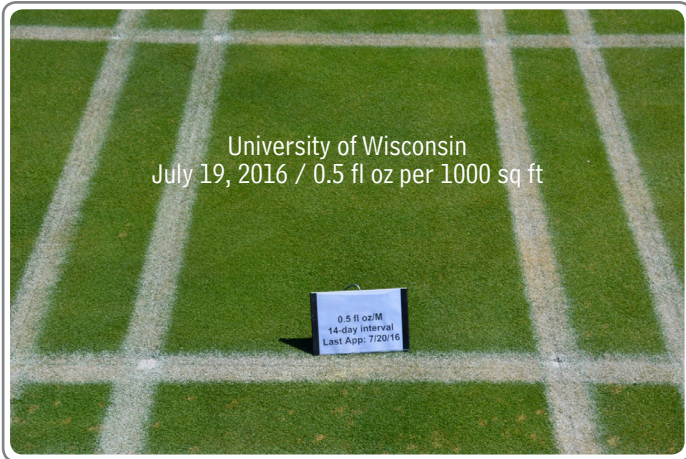

Dollar Spot Including resistant bio types
Anthracnose
Brown Patch Large Patch
Leaf Spot Melting Out Brown Blight
Grey Snow Mold
Pink Snow Mold
Red Thread
Stem Rust
Algal Scum
Pink Patch
